The Air Navigation Engineering Diploma Program is one of the Diploma Programs at the Surabaya Aviation Polytechnic, in terms of attendance for the cadets it still uses a manual system, such as using paper to record the attendance list of cadets, therefore the need for a web-based attendance system makes it easier for work and can be useful for all Air Navigation Engineering Diploma Programs at Surabaya Aviation Polytechnic. In good and correct data processing, it must be processed, stored, and presented in a computerized manner.

In making this website using hardware in the form of a computer, and software in the form of Sublime Text, Xampp and the website already uses the internet network and can be accessed easily.

Design and build web-based attendance at the Surabaya Aviation Polytechnic to show how this tool or website works to perform attendance at the Air Navigation Engineering Diploma Program at the Surabaya Aviation Polytechnic. easy and the website can be developed more complex in the future.
